DETAILED ACTION

Election/Restrictions

Claims 12-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 4.

The Applicant elects Group I and Species I (referring to Figs. 1-3 and claims 1-14), however, claims 12-14 are referring to different species. Therefore, claims 12-14 are withdrawn from further consideration.

This application contains claims 12-23 are drawn to an invention nonelected without traverse in Paper No. 4. A complete reply to the rejection must include the cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Drawings

The drawings are objected to because the "coated support" element (11) does not show a phantom, hidden or projected line. Element 11 looks like a hollow part of the stent. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. Correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3738

Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is not understood. What are the two sleeves? Does the two sleeves are part of the second coating?

Regarding claim 5, the Applicant's representative in claiming a third coating but claim 1 is only claiming a first coating. The second coating is not positively claimed. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-8, 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown US Patent 6,348,060 B1.

Brown discloses a delivery system (10) comprising a balloon (12), and a stent (18). The whole catheter is coated (including the balloon) with an adhesion-resistant treatment (see col. 3, lines 23-43 and col. 4, lines 20-37). Additionally, Brown discloses a plurality of coatings (see col. 3, line 38).

Application/Control Number: 09/842,833

Art Unit: 3738

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Page 4

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brown US Patent

6,348,060.

Brown discloses the invention substantially as claimed. However, Brown does not

disclose an adhesion-resistance treatment made of carbonwax coating.

At the time the invention was made, it would have been an obvious matter of design

choice to a person of ordinary skill in the art to modify the adhesion-resistance treatment coating

(e.g. hydrophilic materials, silicone, polypropylene materials, polyethylene, hydrogels, etc.) of

the Brown reference because the Applicant has not disclosed that the carbonwax coating

provides an advantage, is used for a particular purpose, or solves a stated problem. One of

ordinary skill in the art, furthermore, would have expected Applicant's invention to perform

equally well with the different coatings of the Brown reference because the above coatings will

perform for the same purpose.

Therefore, it would have been an obvious matter of design choice to modify the Brown

reference to obtain the invention as specified in claim 9.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.
